

Dean's Message for March, 2017

Probably the most challenging issue your Executive Committee deals with is balancing income versus expenditures. The problem – our income from year-to-year remains relatively stable but inflation impacts our costs.

To maintain our present level of programming and to consider the possibility of additional activities we need to find ways to increase our income.

With that in mind, the Executive Committee, at our last meeting, had a brainstorming session to generate some possible revenue generating activities. As a result, we left with a list of five or six possibilities. These will be reviewed and discussed at a later date.

Now we would like to hear from you! You probably have some ideas that we haven't thought of. Some of you have been active in other Chapters and can share what those Chapters did to supplement their income from dues.

Please take a minute and send me your ideas (cdgrace62@gmail.com). Everything you suggest will be shared with the Executive Committee. Your suggestions will remain anonymous.
